MadmucFarm Website and Server Menu

Website URL: http://madmucfarmserver.appspot.com
Default User Name: admin
Default Password: admin

***You can also use your username and password to login website if you had create one before from the website

Default Website Operation:

- Add and Delete Admin or User:
  The account is the used to login to the website and the device. Administrator will have privilege to login website and modify the data on the mobile device where user can only browse data on the mobile device.

- Create and Delete Farms
  This operation can create or delete the existing farm.
  Strongly recommend doing these two operations only at the beginning of the year or at the end of the year after you have reset the farm data.

- Create, Modify and Delete template
  Create, modify and delete template, which can be used on the device.

- Look up Report
  Click on bins or farm name to look up the current report.
  At the report page, you can look up the current data on that farm or make a .csv file. To see how to make .csv file please look at the Special Website operation, making .csv file.

- Reset (Erase) data (be careful with this operation)
  This operation will reset the data (bins, fields' note, seeding, chemical, cultivate, harvest and soil test) on the server and when the device sync with the server, their data on their device will be erase too.

Special Website Operation:

- Making .csv file (for excel):
    1. In the Report section click the farm you want to make the csv file.
    2. Click the CSV file button. => A window will pop up.
    3. Click on the blank space on the window and select all (control + A for window user) and copy (Control +C for window user).
    4. Open a new text file and past what we copy in step 3 on it. Make the text file with extension **.csv (** is the file name which you can choose what you like)
    5. Save the file and you can use excel to open it.

Advance: Data look up from server(Optional)

Google App Engine Server: https://developers.google.com/appengine/
